High-pressure folding container for drilling sites

Overview

What are explosion-proof positive pressure containers used for?

Explosion-proof positive pressure containers are used in oil and gas drilling platforms (Zone 1 & Zone 2), chemical plants, refineries, LNG stations, and other industrial sites with flammable or explosive gases.

What is a pressurized container?

In hazardous environments and extreme climates, Pressurized Containers have become a key technological solution for ensuring industrial production and personnel safety. TLS Offshore Containers / TLS Special Containers is a global supplier of standard and customised containerised solutions.

Why do specialized containers need a positive pressure environment?

In hazardous environments, extreme climates, or industrial settings with stringent air quality requirements, specialized containers must maintain a positive pressure environment to ensure personnel safety, stable equipment operation, and prevent the ingress of external pollutants.

What are intelligent pressurized containers?

At the heart of our offering are the intelligent pressurized containers, engineered to perfection to cater to the unique needs of each client. Featuring sophisticated HVAC and power control systems, these containers are constructed to ensure a secure and conducive environment for both personnel and equipment.

Then our Offshore high pressure container is just what you need. Designed specifically for the challenging conditions at sea, this container offers a combination of durability, flexibility and ...

Folding container houses are built to withstand extreme weather conditions, making them an ideal choice for oil and gas drilling sites located in harsh environments. They are constructed using ...

Explosion-proof positive pressure containers are used in oil and gas drilling platforms (Zone 1 & Zone 2), chemical plants, refineries, ...

Product Introduction The WELLCAMP Folding Container House is an innovative modular building solution designed for rapid deployment, cost efficiency, and long-term use. Built with high ...

Discover TLS Offshore Containers' intelligent pressurized containers - safe, certified, and customizable solutions for offshore ...

Our mobile container solutions impress with high flexibility and versatility. They provide space for complete drilling rigs or drilling drives, are mounted on special oilfield frames, and can be ...

Discover TLS Offshore Containers' intelligent pressurized containers - safe, certified, and customizable solutions for offshore hazardous area operations.

Advanced Container Co. supplies rugged, secure, and customized shipping containers built to withstand the harsh demands of oilfield and offshore environments. With over 35 years of ...

ScanTech Offshore's high pressure compressors are fully containerised and have a rated compressed air flow of 1070 acfm, with an operating ...

China High Pressure Container Manufacturer High pressure containers are specialized equipment designed to safely contain and manage substances under significant ...

Explosion-proof positive pressure containers are used in oil and gas drilling platforms (Zone 1 & Zone 2), chemical plants, refineries, LNG stations, and other industrial ...

The Maximator Transportable Hydrostatic Pressure Test Unit is a fully containerised, high-pressure liquid testing system engineered for ...

Then our Offshore high pressure container is just what you need. Designed specifically for the challenging conditions at sea, this container offers a ...

ScanTech Offshore's high pressure compressors are fully containerised and have a rated compressed air flow of 1070 acfm, with an operating pressure range between 150 and 350 ...

The Maximator Transportable Hydrostatic Pressure Test Unit is a fully containerised, high-pressure liquid testing system engineered for challenging onsite environments such as mining ...
