# **Home solar panels in Tampere Finland**

## Overview

---

How many solar panels are installed in Finland?

Finland's production capacity is 16 000 m<sup>2</sup> /a. New installations were: 2 380 m<sup>2</sup> (2006), 1 668 m<sup>2</sup> (2005) and 1 141 m<sup>2</sup> (2004). There are growth opportunities in the solar heating. In 2018 S-Ryhämä decided to order solar panels for 40 of its commercial real estate buildings. This is the biggest solar panel project in Finnish history.

Does Finland have solar power?

There is plenty of solar energy available in Finland, and solar power is predicted to be one of the lowest-cost electricity production methods in the coming years.

Where should I buy solar panels?

We recommend acquiring your panels from a reliable company that is sure to remain in business for the entire lifecycle of your solar power system. A good salesperson will answer any use-phase questions you may have, handle your warranty issues, if necessary, and enable you to expand your system and add new products to it.

Are solar panels suitable for detached homes?

Solar panels are suitable for the roofs of detached homes regardless of the type of roof. Our system components have been selected especially for Finnish conditions, with specific mounting systems for different roof types. Our solar panel packages are always tailored according to each customer's needs.
