# **Hot sale wholesale rv circuit breaker for sale**

## Overview

---

What is an RV circuit breaker?

Just like your breaker at home, your RV's circuit breaker is designed to protect you and your camper in the event of a power surge, short circuit, or overloaded plug-in that could be dangerous. A circuit breaker is designed to cut off — or break — power to all devices on a particular circuit before they can cause damage.

Why do RV circuit breakers trip?

Circuit breakers prevent your RV's electrical system from becoming overloaded and therefore, causing fire and electric shock. In other words, they act as a failsafe: they interrupt the power in case of an electrical surge. This is the main reason why they trip.

Do RV circuits come in different AMP sizes?

Our circuits come in different amp sizes to fit your needs and get your electric up and running in your RV. Keep your breaker box working like a charm with our replacement circuit breakers. Check out our awesome variety of RV circuits and breakers to keep your electric on for your next family vacation.

What are the different types of circuit breakers?

The industry currently offers a wide range of single- and double-pole circuit breakers to choose from. The former are probably the most popular ones. They are built to monitor the current of a single wire. Obviously, double-pole ones monitor the current of two wires and interrupt it simultaneously.
