

How long is the warranty period for an uninterruptible power supply

Overview

In terms of a UPS system, a warranty provides 'best endeavour' protection against mechanical faults or failures for a set period of time, typically 1 or 2 years from initial purchase, while UPS maintenance contracts offer ongoing support with the additional peace of mind of guaranteed emergency response times for engineer call-outs. How long does an uninterruptible power supply last?

Like all other IT equipment, an uninterruptible power supply (UPS) has a finite lifespan. The average expected lifecycle of a UPS is eight-to-ten years. The batteries typically need to be replaced at least three times during that lifespan. Of course, once a UPS reaches the end of its lifespan, it should be replaced to mitigate downtime.

What is the life of a UPS (uninterruptible power supplies) unit?

1. What is the lifespan and service life of a UPS (Uninterruptible Power Supplies) unit?

Although it depends on the environment in which the UPS is used, it is generally said to last between 5 and 15 years. This also varies depending on the size, so please see the table below for details.

Does an uninterruptible power supply represent a significant capital investment?

Because an uninterruptible power supply (UPS) can represent a significant capital investment, it is important to have a general idea of how many years that investment will last.

Why is a power supply warranty important?

It empowers methodical decision-making, ensuring your power supply aligns seamlessly with your long-term operational needs. A power supply's warranty period indicates the manufacturer's trust in its reliability and durability.
