**How many 5G base stations are there in Germany 3 44MWh**

## Overview

---

### Does Germany have 5G?

The telco kicked off the rollout of its 5G network in a limited number of cities across Germany at the beginning of July 2019. Meanwhile, Vodafone Germany said its 5G network is already providing coverage to 65 million people across the country, representing nearly 80% of Germany's population.

### Which cities in Germany have a 5G network?

Cities with the higher number of 3.6 GHz stations include Berlin, Munich, Hamburg and Cologne. The telco also said it is currently focusing on the provision of 5G in rural areas across Germany via spectrum in the 700 MHz band. The carrier also said it expects to cover the country's overall population with 5G by the end of 2025.

### How many 5G base stations are there in the United States?

While China leads in sheer numbers, the U.S. is making steady progress. By late 2023, the country had between 150,000 and 200,000 active 5G base stations. The deployment strategy in the U.S. is different from China's, as it relies on private investment rather than government-led initiatives. Is this article too long?

### Will 5G reach 80% of Germany's population in 2022?

During 2022, Germany's largest operators have been focusing on the expansion of their 5G networks, with some operators already offering coverage to more than 80% of the country's population. German carrier Deutsche Telekom recently said its 5G network already reaches 94% of the country's population.
