# **How many 5G base stations has South Korea Telecom built**

## Overview

---

How many 5G base stations does South Korea have?

In the report, South Korea ranked first among 29 countries, including non-OECD members such as China and the European Union, in “5G base station deployment.” The country recorded 593 5G base stations per 100,000 inhabitants, significantly surpassing Lithuania (328) and Finland (251).

Does South Korea have 5G?

South Korea was the first country to launch commercial 5G networks in April 2019 and currently has 5G coverage across its 85 cities. The total number of 5G subscribers in South Korea reached nearly 24 million in May, Korean press reported, citing data from the Ministry of Science and ICT.

Which country has the most 5G base stations?

This growth was attributed mainly to the introduction of 5G. Notably, Korea was highlighted as follows: 1st in 5G Base Stations Relative to Population: Korea has 593 base stations per 100,000 inhabitants, ranking first ahead of Lithuania (328) and Finland (251).

How many 5G base stations are there per 100,000 people?

The country recorded 593 5G base stations per 100,000 inhabitants, significantly surpassing Lithuania (328) and Finland (251). The OECD average stood at just 100 base stations per 100,000 inhabitants. In the category of “number of 5G connections per 100 inhabitants,” the United States led with 68.4 connections, followed by South Korea with 63.
