# **How many battery replacement stations are there in Malabo**

## Overview

---

How many Nio battery swap stations will there be in 2025?

This year, NIO has raised its target of having over 700 instead of 500 battery swap stations installed by year end. From 2022 to 2025, NIO commits to installing 600 new battery swap stations in China. By the end of 2025, NIO will have over 4,000 NIO battery swap stations worldwide with around 1,000 outside of China.

How many battery swap stations are there in China?

One of the most notable pioneers in this space is Nio, a Chinese electric car manufacturer, that has made battery swapping a cornerstone of its business model. As of June 2024, Nio had installed 2,432 power swap stations in China, including 804 swap stations based on highways.

How many battery swap stations does Nio have in China?

As of June 2024, Nio had installed 2,432 power swap stations in China, including 804 swap stations based on highways. This represents the largest battery swapping network in China, with the company aiming to have 4,000 battery swap stations globally by 2025. Other Chinese automakers are also getting involved.

Which city has the most Nio battery swap stations?

The city with the most Nio battery swap stations is Shanghai, with a total of 190 stations. As of the end of 2024, Shanghai has a population of about 24.8 million and is one of China's megacities. On April 13 this year, Nio announced that it had delivered its 100,000th vehicle in this city.
