How many communication solar base stations are there in Georgia

Overview

How many solar farms are in Georgia?

As of December 2025, there were 152 utility-scale solar farms in Georgia. Their total operating capacity is 5,414 megawatts (MW). How many solar farms were built last year in Georgia?

In 2024, there were 8 solar farms built in Georgia. What is the largest solar farm in Georgia?

The largest solar farm in Georgia is Wadley Solar as of December 2025.

Does Georgia have a solar market?

National Solar Capacity Ranking: 7th Data Current Through: Q1 2025
Georgia's solar and storage market has taken off in recent years, landing it a top spot in SEIA's national solar rankings. During the 2024 session, an industry-supported decommissioning bill was passed after much collaboration and effort.

What is the largest solar farm in Georgia?

The largest solar farm in Georgia is Wadley Solar as of December 2025. The project is located in Jefferson, GA and has a capacity of 260 MW. Cleanview tracks 10,000+ power projects, 1,000+ data centers, and 700+ developers in the U.S. Each month we spend hundreds of hours researching and updating our database.

What is community solar?

Community solar is the next big piece of the puzzle that solar advocates have their sights set on to expand in the state. Official SEIA State Affiliate Data
