How much does an off-grid folding container for Australian base stations cost

Overview

What is a containerised Offgrid system?

Power where the grid can't go — delivered in a single, rugged container. MyEnergy designs and builds turnkey off-grid systems inside 10-, 20- or 40-foot containers, pre-wired, factory-tested and ready to run the moment they land on site. What is a containerised off-grid system?

.

How do off grid pods® work?

Using an internet connection the Off Grid Pods® can be remotely accessed on your phone from anywhere in the world to check on power generation and system health. The electricity an Off Grid Pods® can generate in one year prevents around 1.97 tons of Co2 from polluting the atmosphere using traditional generation methods. Make the right choice!.

What does a modbox solar container include?

A typical ModBox solar container includes battery storage, inverter setup, internal racking, cabling, ventilation, and secure access. We can also include external solar panel mounting or integrate with your existing array. Can I use a solar container to power other ModBox units?

Absolutely.

What makes off-grid pods® unique?

Strong steel, extensive R&D, industry leading components and durable paint coatings enables Off Grid Pods® to operate in extreme environments. Add more solar panels, batteries, a back up generator, water desalination or waste water system to create a custom solution that meets your unique needs.
