# How much electricity will solar panels reduce each year

**2MW / 5MWh  
Customizable**

## Overview

---

How much money can you save with solar panels?

Most homeowners save around \$50,000 over 25 years. Solar panels require an upfront investment but provide significant savings on energy bills over time. Depending on your area's electricity costs, you could save between \$37,000 and \$148,000 over 25 years with solar panels.

Do solar panels save money on electricity bills?

The amount of money that you save on your electricity bills when you install solar panels depends on the size of the solar power system you install. Larger systems are able to collect more sunlight, thereby increasing the amount of electricity they produce.

How much money can a woman save with solar energy?

She can expect to save around \$200 per month on her electricity bills and pay back the cost of the system in less than 5 years. Her return on this investment is equivalent to having put the same money into stocks that gained 7% per year over this period. And after this pay-back period, her solar electricity is free.

Are solar panels a good investment?

Solar panels require an upfront investment but provide significant savings on energy bills over time. Depending on your area's electricity costs, you could save between \$37,000 and \$148,000 over 25 years with solar panels. The higher your local electricity prices, the greater your potential for solar savings.
