How to disassemble the solar container lithium battery of solar container communication station

Overview

How do you disassemble a lithium-ion battery pack?

When breaking down a lithium-ion battery pack, having the right tools for the job is critical. The tools you use to disassemble a lithium-ion battery pack can be the difference between salvaging a bunch of great cells and starting a fire. 5 pack of flush cut pliers. Perfect for removing the nickel strip that is attached to cells when salvaging.

Can you take apart a lithium-ion battery pack?

Taking apart a lithium-ion battery pack may appear challenging at first, but with a solid approach and some patience, anyone can do it. It's super important to understand the connections between battery cells and to recognize the potential risks, like shoulder shorts.

What happens if you break down a lithium-ion battery pack?

There is no BMS there to protect the battery, you, your house, or your family. So, when you are breaking down a lithium-ion battery pack, proceed with caution. If you accidentally short out a complete battery pack with a BMS, you might make a big spark, temporarily disturbing your vision, and could possibly receive a small burn.

How do you remove a battery pack from a car?

Whatever the main battery pack is electrically connected to, remove it. Remove any circuit boards, regulators, lights, wires, or anything else there is, and get it down to the raw battery pack. Step 2: Mask off the area that you are not working on with Kapton tape or any other easily removable adhesive insulator.
