

NKOSITHANDILEB SOLAR

Huawei Jakarta solar container outdoor power Factory

Overview

What is a 100 MWp solar power plant in Indonesia?

Heaptalk, Jakarta — PLN, in collaboration with PT Aruna Cahaya Pratama (Aruna PV), China Power Hubei, and Huawei, to finalize the installation of the ground-mounted solar power plant in Indonesia with the capacity of 100 Megawatt peak (MWp), located at the Bukit Indah Industrial Zone in Purwakarta, West Java.

How will Huawei contribute to a green industrial area in Purwakarta?

The green power project involves the installation of 170,000 solar panels and 240 inverters over an area of 85 hectares. "Our involvement in the Puwakarta 100 MW project is Huawei's tangible contribution in implementing the concept of a green industrial area in Purwakarta.

How big is Indonesia's solar PV capacity?

Initial insights show that Indonesia's installed solar PV capacity has reached about 717.7 MW, and the number of electric car charging piles is also multiplying, reaching 2704, with a target completion rate of 261%. These changes pose great challenges for electricity companies, especially on the distribution side".

What is Huawei digital power?

Huawei Digital Power is committed to integrating digital and power electronics technologies, developing clean power, and enabling energy digitalization to drive energy revolution for a better, greener future. In the clean power generation sector, we help create new power systems that primarily rely on renewable energy.
