Overview

How can Huawei support Europe's digital transformation?

Digital infrastructure is the foundation of successful digital and intelligent transformation. Ma emphasized Huawei's commitment to supporting Europe's digital transition through innovation in ICT products and solutions, as well as enabling local partners to develop more competitive solutions for a wide range of domains and scenarios.

Is Huawei planning a new 5G plant in France?

PARIS, Dec 10 (Reuters) - Huawei is considering the future of a recently completed plant in eastern France, three people familiar with the matter said, amid the slow roll-out of 5G in Europe and a hardening stance by some governments on using Chinese equipment.

Does Huawei use string inverter technology?

Since 2013, Huawei has chosen string inverter technology. In 2020, Huawei launched the industry's first string ESS, which uses controllable power electronics technologies to resolve the inconsistency and uncertainty of lithium batteries.

How many employees does Huawei have in France?

Of its 1,100 employees, 80 percent are locally hired. Zhang Minggang, deputy CEO of Huawei Technologies France, said that for Huawei, France and Europe are more than just important markets, they possess a sound industrial foundation, strong innovation capabilities, rich culture, and are host to numerous international standard organizations.
