## Overview

---

How to contact Huawei energy storage module?

You can also contact us through the local service hotline on Huawei official website. Note a: 6.9 kWh is the initial capacity (designed) of the Energy Storage Module. The actual capacity is affected by the external environment (such as temperature, transportation, and storage). Step 1 Access the Commission Device screen.

What is the maximum input PV power for a Huawei inverter?

Recommended max. PV power 1 \*1. The inverter max input PV power is 10,000 Wp when long strings are designed and fully connected with optimizers. Disclaimer: The preceding values are measured by an internal laboratory of Huawei in a specific environment.

How to contact Huawei residential inverters & ESSs?

If you have any questions about Huawei residential inverters and ESSs, contact the device distributor and installer. You can also contact us through the local service hotline on Huawei official website. Note a: 6.9 kWh is the initial capacity (designed) of the Energy Storage Module.

What if the battery-1/2/3/4 power control module update fails?

The version of the power control modules in [Battery-1/2/3/4] is inconsistent with that of other power control modules in the parallel system and needs to be updated. 2. If the update fails multiple times, contact your dealer or technical support. The version of the battery power control modules is inconsistent with that of the battery packs.
