

# IP of Huawei grid-connected inverter

◆ **PRODUCT INFORMATION** ◆

Energy Storage System

DW-ESS-100P-200

-  **BATTERY CAPACITY**  
50kWh~500kWh
-  **DC VOLTAGE RANGE**  
400V~1000V
-  **DEGREE OF PROTECTION**  
IP54
-  **OPERATING TEMPERATURE RANGE**  
-10~50°C

## Overview

---

What is the maximum input PV power for a Huawei inverter?

Recommended max. PV power 1 \*1.The inverter max input PV power is 10,000 Wp when long strings are designed and fully connected with optimizers.  
Disclaimer: The preceding values are measured by an internal laboratory of Huawei in a specific environment.

How to configure a Huawei solar inverter?

Select Huawei Solar from the list Enter the IP address of your inverter (192.168.200.1 if you are connected to its WiFi AP). The slave id is typically 0. You should only check the Advanced: enable parameter configuration checkbox if you intend to dynamically change your battery settings.

Does Huawei inverter support Modbus-TCP?

Starting from firmware updates released in December 2021, Huawei has closed the Modbus-TCP interface on the network to which the inverter connects. ie. If the inverter is connected to your home network on 192.168.1.11, it will no longer be possible to connect on that IP.

Does fusion solar work with a Huawei inverter?

A: The inverter will still send it's data to the Huawei cloud, and you will still be able to see live statistics from your installation in the FusionSolar App. However, if you (or your installer) need to use the 'Device commissioning' feature of the app, you will need to disable this integration.

What IP-address and port should I enter? Starting from firmware updates released in December 2021, Huawei has closed the ...

Open the browser, enter <https://intl.fusionsolar.huawei> in the address box, and press Enter. The login page is displayed. Log in as the company administrator or installer. ...

Networking 1: Single Inverter (Backup Box) The grid-tied and off-grid ESS consists of the PV strings, LUNA2000 batteries, inverter, AC switch, load, Backup Box, PDU, Smart Power ...

This document describes how to connect the commercial inverter to Huawei NetEco 1000S Smart PV Management System by using the distributed SmartLogger1000A. Setting ...

Many regions impose a limit on the feed-in power of a power generation system. Therefore, a power meter is required to measure the power at the grid-tied point to control the output of the ...

How to find out originally used IP to setup inverter #756 Answered by nighty2k7  
nighty2k7 asked this question in Setting up the integration nighty2k7

Procedure On the home screen, choose Power adjustment > Grid-tied point control.

This solution mainly applies to residential or small-scale ground-mounted PV plants, in which the inverter and power meter are connected to the FusionSolar Smart PV

Management System ...
