Indonesia 5G base station power supply and distribution construction

Overview

What is new Indonesia technical standard for 5G devices?

This regulation regarding new Indonesia technical standard for 5G devices applies to subscribers and base station devices used for Broadband Wireless Access (BWA). New Indonesia technical standard for 5G devices are part of efforts to modernize the regulatory structure to support the deployment of next-generation networks.

What is new Indonesia technical standard for 5G BWA?

New Indonesia technical standard for 5G devices are part of efforts to modernize the regulatory structure to support the deployment of next-generation networks. The regulation of the new Indonesia technical standard for 5G BWA is, of course, inseparable from efforts to harmonize with international norms.

What is a 5G subscriber station?

Subscriber Stations (SS): A radio access device on the user side, such as a 5G modem or router. Base Station (BS): Is a network core device that transmits 5G signals to the surrounding area. Before it can be legally used or marketed, the device must meet some established technical requirements. Here are some of the standards that must be met:.

What are 5G BWA devices?

This decision covers two main categories of 5G BWA devices: Subscriber Stations (SS): A radio access device on the user side, such as a 5G modem or router. Base Station (BS): Is a network core device that transmits 5G signals to the surrounding area.
