Installation of solar panels in New York USA

Overview

How much do solar panels cost in NYC?

The cost of solar panels in NYC will come down to the system size, panel type, and installation complexities. Residential systems can vary in price from \$20,000 upwards before any incentives or rebates. To get the exact price, you can receive a quote from us and find out about the solar incentives available in NYC.

Is New York a good place to install solar panels?

New York's got it all - the Big Apple, the rolling Catskill Mountains, and a thriving solar industry. Despite not being the sunniest place, high electricity rates and solar-friendly policy has allowed homeowners across the state to enjoy all the benefits of installing solar panels.

How do I choose a solar company in New York?

Solar companies that are licensed, insured and hold certifications take their business seriously. Look for companies that have NABCEP Certified professionals or certified electricians on staff and are properly insured, so their workers, and you, are protected. For installation companies in New York, no statewide licensing is required.

Does New York have solar energy?

New York is an early adopter of solar energy in the United States with a total installed capacity of 3.6 GW across nearly 163,000 projects as of Q1 2022. The State of New York has a healthy mix of residential, commercial, community, and utility-scale solar.
