How much does a solar inverter cost?

Because they depend on the grid, there's no backup power during outages. Off-grid inverters vary from \$2000 to \$6000+, depending on the capacity and features. This type of inverter is designed for standalone solar systems not connected to the grid, making it ideal for remote locations without grid access.

How much does a microinverter cost?

Microinverters have the advantage of ensuring the maximum energy for systems with shading or mismatched panel orientations. However, microinverters might have higher upfront costs due to the need for multiple units. String inverters cost from \$1000 to \$2500 for residential systems and have capacities from 3 kW to 10 kW.
