# **Investment in a 15kW Off-Grid Solar Container in Türkiye**

## Overview

---

How many people use solar energy in Turkey?

As a consequence of these flourishing developments, the Turkish solar energy sector currently employs over 50,000 people. The share of variable renewable energy sources, such as solar and wind, in total electricity generation is expected to increase. This is considering Türkiye's current flexibility opportunities, and renewable energy potential.

What is the future of solar energy in Turkey?

The Turkey solar energy market also attracts tracker specialists, with PVH supplying single-axis systems to a 157 MW plant in Şanlıurfa. This opens a service ecosystem in O&M, drone-based inspections, and digital performance analytics. White-space opportunities arise in storage, green hydrogen, and agrivoltaics.

How can Türkiye reduce its reliance on imported energy?

As a net energy importer, Türkiye is keen to reduce its reliance on imported energy by increasing its use of renewable sources. By 2035, the aim is to increase the amount of renewable energy to 64.7% of the total energy capacity in Türkiye.

What is the National Energy Plan of Türkiye?

The Ministry of Energy and Natural Resources (ETKB) released the National Energy Plan of Türkiye, which covers the period from 2020 to 2035. to add 10 GW of production capacity by the second half of 2023, bringing the total annual production capacity to 22 GW per year.
