Is it easy to find a job in base station communications

Overview

What is a communication base station?

Communication base station setups will usually include a wide array of different technologies, including power supplies, data servers, head end, radio repeaters, and communication systems that allow for high-speed continuous information flow. It can also be used as part of a leaky feeder system in the communication network.

Where is a radio operator based?

As a Radio Operator you will be based in the Operations Tower at the Rothera Research Station on Adelaide Island on the Antarctic Peninsula. Rothera is BAS's main site of operations in the Antarctic and one of the most scenically spectacular places on the continent.

How do I get a job in communications?

A good way to build a network in the communications field is to reach out to people and make connections. If you're looking for internships or volunteer opportunities, try contacting companies directly through their website or online profile.

What does it mean to work in communications?

Working in communications can encompass many roles, including marketing, public relations and journalism. No matter what your specific job title is, working in communications involves communicating with people to share information. This includes deciding what information to convey and the most suitable way to convey it.
