Is it good to install solar panels

Overview

Should you install solar panels on your roof?

Using an irradiance map can help determine how much sunlight a roof receives, and that data can be used by homeowners to discover if it's worth installing solar panels. Homes located in states with little to no rain or cloud cover—and without a lot of shade covering the roof—are prime candidates for solar panels.

Should you install solar?

"It depends on what is motivating the household to make the decision to [install] solar," Becca Jones-Albertus, director of the US Department of Energy Solar Energy Technologies Office, told CNET. If you're looking to be 100% energy independent or live off the grid, solar could be a good way to reach those goals.

Are solar panels a good choice for your home?

Homes that have energy usage in excess of 500 kilowatt hours (kWH) per month are usually excellent candidates for solar panels. If the solar panel system produces excess energy, or more energy than the home uses, homeowners can sell the extra energy output to the local utility company each month.

Are solar panels worth it?

Solar panels make financial sense for most homeowners, but certain conditions maximize your return on investment. Here's when solar is typically worth it: Solar panels are a long-term investment that generate free electricity for 25-30 years. If you own your home, you'll capture all those benefits.
