# Is it profitable to install solar panels on the roof

## Overview

---

Is the cost of solar roof panels worth it?

The solar cells inside roof panels are almost invisible and generate electricity over time, making the price of a solar roof even cheaper in the long run than regular roofs. The author's experience with a solar roof this summer was great: they used 20% of the generated energy in their household and sold back 80% to the grid.

How much does a solar roof replacement cost?

The cost of replacing a roof with solar panels includes the average cost of \$1500 to \$5500 for removing and re-installing the solar panels. Additionally, you need to add the cost of the roof replacement project itself.

Do I need a roofing company before installing solar panels?

It is advisable to have a roofing company assess your roof before installing solar panels. If the roofer determines that repairs or replacement are necessary, doing so before installation can help prevent future roof-related issues.

Are solar panels a good investment?

Pros: The energy produced by your solar system is free, and if your utility uses net metering, it credits you for any excess electricity that is added to the grid, helping you to break even more quickly on the project's cost. You may be able to get a loan to help pay for the costs of installing solar panels.
