## Overview

---

What are the new EU power supply regulations?

**Expanded Scope:** The new regulations will apply not only to external power supplies but also to battery chargers, wireless charging pads, and USB-C cables sold in the EU. **Increased Power Capabilities:** The limitation on product power of 250W will be lifted, allowing for more powerful devices to be designed, aligning with sustainability goals.

What are the new ecodesign requirements for external power supplies?

The draft Commission Regulation proposes new ecodesign requirements for External Power Supplies (EPS), Battery Chargers for portable batteries, Wireless Chargers, Wireless Charging Pads, and USB Type-C cables. 1. Extending the scope - Wireless Chargers and Battery Chargers for portable batteries, as per Regulation (EU) 2023/1542. 2.

Are 'external power supplies' covered by EcoDesign regulations?

Known as 'External Power Supplies', these products are covered by ecodesign regulations that are about to be updated. The European Commission has just published a draft revision of this legislation. What does the draft get right, and what must still be improved?

.

What legal and regulatory considerations should you consider when using portable power stations?

Here are some key legal and regulatory considerations that users should take into account when using portable power stations. The EU Battery Regulation (2023/1542) officially came into effect on Aug, aiming to prevent and mitigate the adverse environmental impact of batteries and ensure the sustainability and safety of all batteries.
