# Is there a battery cabinet factory in North America

## Overview

---

How many battery factories are there in the United States?

Today, there are about 34 battery factories either planned, under construction, or operational in the country. Former U.S. President Joe Biden's Inflation Reduction Act (IRA), signed into law on Aug, might not have been the initial catalyst behind the onshoring battery factory trend.

How has EV battery production changed in North America?

The landscape of electric vehicle (EV) battery production in North America has undergone a remarkable transformation in recent years. What began as a small effort to bring EV battery manufacturing back to the U.S. has quickly gained significant momentum, resulting in a full-blown construction boom.

Are EV batteries being built in North America?

North America is experiencing an unprecedented surge in the construction of EV battery factories. Explore where plants are being built, who's investing, and what this means for the electric vehicle revolution.

When was the first battery enclosure made?

Our first battery enclosure was produced in Europe in 2011 for a hybrid electric vehicle. Magna provides a comprehensive range of battery enclosure production and engineering solutions, available in steel, aluminum, and innovative one-piece designs.
