Israeli Energy Storage Container 20kW

Overview

How much does a battery storage project cost in Israel?

The Israeli Electricity Authority (IEA) has awarded contracts for 1.5 GW of high-voltage battery storage capacity across 11 projects to be developed in three regions of Israel. The tender, which attracted 11 bidders proposing 29 projects for a total capacity of 4 GW, set capacity tariffs ranging from US\$49.41/kWh to US\$74.20/kWh.

How much does a battery cost in Israel?

Israel's storage tender sets prices between \$0.0056 and \$0.0085 per kW, with kWh figures therefore at \$49.41 to \$74.20 per kWh. From ESS News Israel has awarded contracts for 1.5 GW of high-voltage battery storage capacity across three regions, marking a significant milestone in the country's energy transition.

How much does a 4 GW power plant cost in Israel?

The tender, which attracted 11 bidders proposing 29 projects for a total capacity of 4 GW, set capacity tariffs ranging from US\$49.41/kWh to US\$74.20/kWh. In Israel's Western Negev region, Noy Storage, Enlight and EDF will build 4 facilities with a cumulative capacity of 560 MW.

What does IEA's energy auction mean for Israel?

The auction, managed by the Israeli Electricity Authority (IEA), will facilitate the deployment of large-scale energy storage systems designed to integrate more renewable energy into the grid. With total investments estimated at ILS 3 billion (~\$840 million), the projects are expected to commence operations in 2027.
