

NKOSITHANDILEB SOLAR

Japanese Energy Storage BESS solar Company

Overview

Utility Osaka Gas and developer Sonnedix are installing a battery energy storage system (BESS) at the latter's 38.7MW Oita solar project, which Osaka Gas described as the largest battery storage facility to be co-located with renewable energy generation in Japan so far. How big is Japan's energy storage capacity?

Japan installed about 190 MW of new energy storage capacity in 2022, doubling its 2021 total of 92 MW. Projections indicate that Japan's cumulative storage capacity could reach over 29 gigawatts (GW) by 2033. This upward trend mirrors global patterns.

Can Eku Energy sell Hirohara Bess & Eshi in Japan?

Kentaro Ono says that Hirohara BESS' tolling deal and the Eshi project's LTDA contract are two of three commercialisation pathways Eku Energy sees potential for in Japan. The third is a full merchant model. Ono says the developer wants to hold a diversified portfolio representing different risk and reward appetites for investment.

What is Gurin Energy doing in Japan?

This includes the announced 500MW, 2GWh BESS capacity, which is currently under development. Targeted percentage of renewable energy in Japan's energy mix by 2030 Japan's target for energy storage capacity by 2030 Amount that Gurin Energy has committed to investing in Japan over six years so far.

How much battery storage is in Japan's LDA?

Battery storage accounted for 22% of the awarded capacity in the latest round of Japan's LTDA, up by around 25% on the first auction. Three big nuclear plants claimed around half the awarded capacity. In total, 1.4 GW of BESS was allocated, with 27 projects awarded contracts as part of the capacity market.
