

NKOSITHANDILEB SOLAR

KOSTAL solar grid-connected inverter

Voltage range:691.2-947.2V

>6000 cycles(100%DOD)

Rated battery capacity:
216KWH (customizable)

EMS communication:
4G/CAN/RS485

Overview

What is a Kostal solar inverter?

KOSTAL solar inverters are the heart of every PV system and therefore the interface between the solar modules and the power grid, and are characterised by their particularly high efficiency and reliability.

What is a solar inverter?

Solar inverters from KOSTAL offer a suitable solution for every application. KOSTAL solar inverters are called string inverters. This means that several solar modules (generators) are connected in series and form a string.

Why do you need a Kotal inverter?

Be it a solar, hybrid or battery inverter, KOSTAL inverters are the perfect application solution for every requirement and for every size of system. Distinguished on numerous occasions for its efficiency. Simply generate solar power and use it smartly Use solar power directly or store it for later Retrofit battery storage easily and quickly.

What is a Kotal solar inverter?

KOSTAL solar inverters are called string inverters. This means that several solar modules (generators) are connected in series and form a string. The direct current (DC) energy generated by the solar modules is then converted into alternating current (AC) by the inverter and can be consumed in the household's own grid or fed into the public grid.
