Kuwait Energy Storage Power Station Subsidy

Overview

How can Kuwait keep pace with rising demand for electricity?

Keeping pace with rising demand for electricity will be critical to Kuwait's economic development, and reforms, such as opening up the power generation sector to independent power producers and independent water and power producers, are key to increasing the currently low share of private company involvement in the sector.

Will Kuwait increase the share of renewables in energy demand?

Kuwait has a soft target of increasing the share of renewables in total energy demand to about 15% by 2030, up from less than 1% today. The potential for increasing the share of renewables in the electricity generation mix in Kuwait is huge, given its substantial solar and wind resources. Central Statistics Office,

Which government institutions are involved in the power sector in Kuwait?

Kuwait has several government institutions participating at varying levels in the power sector, all with different mandates. The Ministry of Electricity and Water is a vertically-integrated utility that oversees all aspects of generation, transmission and distribution electricity, as well as the production of most of Kuwait's drinking water.

Why does Kuwait have a slow adoption of renewables?

The dearth of private sector participation in Kuwait's power sector has also contributed to the slow adoption of renewables. The Az Zour North power station is the first independent water and power project in Kuwait. Kuwait Authority for Partnership Projects (KAPP) negotiated the public-private partnership on behalf of the government.
