Kyiv 100MW energy storage project

Overview

Will a new battery storage facility strengthen Ukraine's grid?

Sept. 10, 2025. (Bohdan Nazarenko/DTEK) Ukraine's biggest private energy firm, DTEK, has launched a major battery storage facility that will bring power to hundreds of thousands of homes and strengthen the grid ahead of expected Russian attacks this winter, the company said.

Will energy storage systems improve Ukraine's power grid?

DTEK reports that construction proceeded faster due to the need to complete the project before the onset of the autumn-winter period. Experts report that energy storage systems will provide Ukraine's power grid with additional resilience and stability.

Does DTEK have energy storage facilities in Ukraine?

This was reported by DTEK's press service. The DTEK Group has connected six new energy storage facilities to the Ukrainian power grid, each with a capacity of 20 to 50 MW. The energy storage facilities were installed in the Kyiv and Dnipropetrovsk regions.

Will DTEK save Ukraine's power?

The DTEK project can store 400 MWh of electricity, which is enough to provide power to 600,000 Ukrainian homes for two hours. The investment will help reduce the risk of accidents and power outages, especially in the event of possible damage to maneuverable generation facilities due to shelling.

DTEK reports that construction proceeded faster due to the need to complete the project before the onset of the autumn-winter period. Experts report that energy storage systems will provide Ukraine's power grid with additional resilience and stability.

This was reported by DTEK's press service. The DTEK Group has connected six new energy storage facilities to the Ukrainian power grid, each with a capacity of 20 to 50 MW. The energy storage facilities were installed in the Kyiv and Dnipropetrovsk regions.

The DTEK project can store 400 MWh of electricity, which is enough to provide power to 600,000 Ukrainian homes for two hours. The investment will help reduce the risk of accidents and power outages, especially in the event of possible damage to maneuverable generation facilities due to shelling.

The project aims to enhance energy supply security and mitigate risks of outages, while also facilitating the integration of renewable energy sources into Ukraine's national grid.

...

In just six months -- under shelling, blackouts, and wartime restrictions -- Ukraine completed Eastern Europe's largest battery storage project: 200 megawatts / 400 megawatt ...

The energy storage facilities were installed in the Kyiv and Dnipropetrovsk regions. The

DTEK project can store 400 MWh of electricity, which is enough to provide power to ...

Let me rephrase that - battery storage has become Ukraine's energy lifeline. The math speaks volumes: every 100MW of installed battery capacity could prevent \$12 million in annual fossil ...

Ukraine's biggest private energy firm, DTEK, has launched a major battery storage facility that will bring power to hundreds of ...

In collaboration with Fluence Energy Inc., an American energy firm that contributed 698 Gridstack batteries for the endeavor, DTEK has established and linked six new battery ...

Ukraine's biggest private energy firm, DTEK, has launched a major battery storage facility that will bring power to hundreds of thousands of homes and strengthen the grid ahead ...

PowerVault Technologies - Summary: The Kiev 100MW energy storage project represents a groundbreaking step in Ukraine's renewable energy transition. This article explores its ...

DTEK Group, together with the U.S. company Fluence, a global leader in energy storage, commissioned 200 MW of capacity with a total storage volume of 400 MWh. The new ...

Ukrainian private utility DTEK has energised the largest battery storage project in the war-torn country and one of the biggest ones in Eastern Europe. The 200 MW/400 MWh ...

Ukrainian private utility DTEK has energised the largest battery storage project in the war-torn country and one of the biggest ...

Infrastructure Development Ukraine - Energy project financing Ukraine: Power Kyiv is transforming Ukraine's energy with resilient, clean infrastructure. Our 1 GW project combines ...
