# Large-scale solar energy in Tunisia

## Overview

---

Why is solar energy important in Tunisia?

Solar energy also contributes to Tunisia's economic development. Expanding the solar energy sector creates job opportunities in manufacturing, installation, maintenance, and research. It attracts foreign investments, particularly in large-scale solar projects like photovoltaic (PV) farms and concentrated solar power (CSP) plants.

Is Tunisia accelerating the deployment of a large-scale photovoltaic sector?

By bna Cairo bureau Tunisia is finally accelerating the deployment of its large-scale photovoltaic (PV) sector after years of slow progress, with construction now underway across multiple major projects, PV-Magazine reported.

Will Tunisia build a large-scale PV project?

Tunisia's Ministry of Industry, Mines and Energy has launched a tender for the construction of several large-scale PV projects with a combined capacity of 200 MW.

How will Tunisia bolster its solar energy capacity?

To bolster its solar energy capacity, the Tunisian government signed agreements with renewable energy firms Scatec and Aelous to build solar plants in Sidi Bouzid and Tozeur. Each 50 MW plant represents a combined investment of €79 million, with construction underway and operations planned to commence in 2025.

After years of delays, Tunisia is accelerating deployment of its large-scale photovoltaic (PV) sector. The Ministry of Industry, Mines, and Energy said construction ...

By bna Cairo bureau Tunisia is finally accelerating the deployment of its large-scale photovoltaic (PV) sector after years of slow progress, with construction now underway across ...

The EUR79 million projects aim to help Tunisia achieve 35% renewable energy by 2030 and reduce reliance on fossil fuels. These solar plants will create jobs, boost electricity ...

The EUR79 million projects aim to help Tunisia achieve 35% renewable energy by 2030 and reduce reliance on fossil fuels. These ...

Tunisia's Ministry of Industry, Mines and Energy has launched a tender for the construction of several large-scale PV projects with a combined capacity of 200 MW. The ...

Tunisia has launched a tender for 1.3 GW of solar capacity, aiming to increase its renewable energy share to 35% by 2030 and reduce its reliance on fossil fuels. After years of ...

The Tunisian government says concession and authorization frameworks are advancing multiple PV projects, while new entrants including SoleCrypt plan additional plants, ...

It attracts foreign investments, particularly in large-scale solar projects like photovoltaic (PV) farms and concentrated solar power (CSP) plants. Additionally, solar energy ...

Further tenders for additional capacities are planned before the end of the year. In October 2024, a new large-scale solar tender was ...

In October 2024, Tunisia launched a new tender for 200 MW of large-scale solar, with submissions due by Jan. 15, 2025. Tunisia's total solar capacity reached 506 MW by the end ...

Further tenders for additional capacities are planned before the end of the year. In October 2024, a new large-scale solar tender was launched, seeking 200 MW of additional ...

Tunisia is finally accelerating the deployment of its large-scale photovoltaic (PV) sector after years of slow progress, with construction now underway across multiple major ...

In October 2024, Tunisia launched a new tender for 200 MW of large-scale solar, with submissions due by Jan. 15, 2025. Tunisia's total solar ...
