Lcl solar panels

Overview

How many solar panels does LCL have?

When LCL Data Centers took over the site in 2021, it already had a one-hectare solar park. This included 2,000 solar panels, capable of producing around 1 MW of electricity. LCL will now add 1,300 extra panels, bringing the total in this solar park to 3,300 panels and enabling the generation of 1.6 MW of electricity.

Is LCL deploying more solar panels at a data center?

Belgian data center firm LCL is deploying more solar panels at one of its data centers. The company this month said it plans to expand its solar panel park at the LCL Wallonia One site in Gembloux.

How many solar panels will LCL Wallonia one have?

Gembloux, 21 November 2022 – The data centers specialist LCL is gearing up to expand its solar panel park at the LCL Wallonia One site. Over the next few months, the data centers specialist plans to add 1,300 photovoltaic panels to the 2,000 already there. So in total, the solar panels park will include 3,300 solar panels.

How many solar panels will LCL data centers have in 2021?

When LCL Data Centers took over the site from Engie in 2021, it already had a one-hectare solar park. This included 2,000 solar panels, capable of producing around 1 MW of electricity. The 1,300 extra panels will take the site's generating capacity to 1.6MW.
