## Overview

---

How will Lithuania support energy storage projects?

Image: Energy Cells via LinkedIn. Lithuania can move ahead with a scheme to provide €180 million (US\$200 million) in grants to energy storage projects after it was approved by the EU. The programme will provide direct grants for the construction of the projects, with a target to support at least 1.2GWh of energy storage projects.

Will EU grant a battery storage project in Lithuania?

How can I export data from Lithuania?

Data is now available through the .Stat Data Explorer, which also allows users to export data in Excel and CSV formats. Lithuania has witnessed several energy transitions over the past decade. With the closure of its only nuclear power plant, Lithuania switched from being a net exporter of electricity to being a net importer.

Is Lithuania a net energy importer?

Lithuania is a net energy importer. In 2019 Lithuania used around 11.4 TWh of electricity after producing just 3.6 TWh. Systematic diversification of energy imports and resources is Lithuania's key energy strategy. Long-term aims were defined in the National Energy Independence strategy in 2012 by Lietuvos Seimas.
