

NKOSITHANDILEB SOLAR

London generator container manufacturer

Overview

What is a containerised diesel generator?

A containerised diesel generator is a complete power unit housed in a modified ISO shipping container, offering long runtimes, noise control, and protection from the elements. These generators are ideal for remote sites, industrial operations, and export use, where durability and mobility are essential.

What is a generator enclosure?

Generator enclosures provide secure and weatherproof storage for your equipment. Learn about our bespoke shipping container conversions today.

Can JPC supply a high power containerised generator unit?

JPC can also supply a high power containerised generator units. Which by widening the ISO container to accommodate a larger generator unit; these larger containerised generator unit can still be lifted into place using standard crane methods with standard locking corner casting positions for road transport.

What can containerising generators do for You?

These bespoke solutions include noise reduction systems for traditional generators, accommodating twin sets within a single container, and rental-ready designs. Containerising generators allows us to deliver a broader range of innovative and flexible power solutions. Enhanced Durability: Optional C4 paint finish for tough environments.
