

## NKOSITHANDILEB SOLAR

# Luxembourg solar Module Transportation Project

## Overview

---

Ministers in Luxembourg have agreed to allow the installation of solar systems alongside motorways and bypasses in road networks after an independent study estimated it could support up to 1.5 GW of new solar capacity. How many photovoltaic panels does ArcelorMittal Luxembourg have?

8,600 photovoltaic panels on the roof of its European Logistic Center. - ArcelorMittal Luxembourg 8,600 photovoltaic panels on ( . ) 8,600 photovoltaic panels on the roof of its European Logistic Center.

Can large-scale solar PV be used in transport infrastructure?

A methodology has been developed to estimate the technical potential of large-scale installation of PV along the EU's transport infrastructure at national and regional level. This provides the basis for quantitatively analysing the possible impact of such solar PV energy generation.

Can transport infrastructure support PV systems in existing buildings?

The transport infrastructure offers an additional avenue to accommodate PV systems in existing built areas. This study explores its potential at a pan-European scale. The European Union (EU) Climate Law, in force since 2021, commits the EU to become climate-neutral by 2050.

Can solar energy be used for EV charging infrastructure in Switzerland?

In 2023, Switzerland awarded a tender for the development of solar energy along national roads to produce renewable energy from PV (overhead light weighted roof) to be primarily used for electric vehicles (EV) charging infrastructure by 2027 .
