# **Manchester UK accelerates new energy storage**

## Overview

---

How will a new battery storage site help UK transition to net zero?

The proposal will support the UK's transition to net zero by providing a boost of energy to the national grid when energy supplies from renewable sources dip - allowing them to be deployed at a greater pace and scale. The battery storage site, close to Kingsway Business Park, is due to launch in 2028.

How many homes will a new battery storage facility power?

A new battery storage facility just off the M62 will soon power over 16,000 homes. Energy developer, Balance Power, has been granted approval for a site in Rochdale. The 30MW facility, off Dig Gate Lane, will help power approximately 16,225 homes and play a key role in strengthening grid stability.

When will the battery storage site launch?

The battery storage site, close to Kingsway Business Park, is due to launch in 2028. We use your sign-up to provide content in ways you've consented to and improve our understanding of you. This may include adverts from us and third parties based on our knowledge of you.

Will Carrington storage be energised in 2027?

Once energised, Carrington Storage will have the capacity to deliver instantaneous power to 2.2 million homes for up to 2 hours, supporting the UK's transition to a renewable-led energy system. Construction began in autumn this year, with energisation targeted for late 2027.
