Metal clad switchgear factory in Puerto-Rico

Overview

Who makes metal clad & metal enclosed switchgear?

Powercon Corporation, located in Severn, Maryland, manufactures quality Metal-Clad and Metal-Enclosed Switchgear as well as a variety of other products serving the needs of the electrical industry.

What does a switchgear contain?

Each cubicle may contain the circuit breaker, bus bars, primary and secondary disconnecting devices, instrument transformers, instruments and relays, secondary wiring and more. The switchgear is designed so that additional circuit breakers or auxiliary cubicles may be added in the future.

What is a Meis switchgear?

The switchgear is designed so that additional circuit breakers or auxiliary cubicles may be added in the future. Powercon's MEIS Switchgear exceeds ANSI/IEEE Standard C37.20.3, with no exceptions taken to any requirement of the ANSI/IEEE. These switches are available with either electrical or mechanical operators.

What is low voltage switchgear?

Critical for commercial operations like powering motors, air conditioners, and lighting, our low voltage (LV) switchgear provides robust protection against short circuits. From 1kV to 38kV, our medium voltage (MV) switchgear options include metal-clad, metal-enclosed, and pad-mounted styles, ideal for medium to large industrial facilities.
