Ministry of Industry and Information Technology on Lithium-ion Batteries for solar container communication stations

Overview

What's new in China's Lithium-ion battery industry?

BEIJING, June 19 -- China's Ministry of Industry and Information Technology on Wednesday unveiled revised guidelines for the lithium-ion battery industry to further strengthen standardized management and promote the high-quality development of the sector.

What will China's new lithium-ion battery regulation mean for the battery industry?

China's industrial regulator plans to launch a major document to guide the production capacity of lithium-ion batteries, which industry experts said will knock out a batch of low-end battery cells and accelerate the structural adjustment of the country's booming lithium-ion battery sector.

What will China's Lithium-ion battery production capacity be in 2025?

The China Automotive Power Battery Industry Innovation Alliance predicted that by 2025, the country's lithium-ion battery production capacity will likely exceed 3,000GWh. However, the capacity utilization rate of the country's lithium-ion battery industry dropped to about 40 percent last year and is likely to reach 35 percent by 2025.

Should lithium-ion battery companies reduce production costs?

The Ministry of Industry and Information Technology unveiled a draft guideline on Wednesday that will guide lithium-ion battery companies to reduce projects that aim solely to expand production capacity. Instead, lithium-ion battery companies will be encouraged to strengthen technological innovation, improve quality and reduce production costs.

Ministry of Industry and Information Technology on Lithium-ion Bat

BEIJING, June 19 -- China's Ministry of Industry and Information Technology on Wednesday unveiled revised guidelines for the lithium-ion battery industry to further strengthen standardized management and promote the high-quality development of the sector.

China's industrial regulator plans to launch a major document to guide the production capacity of lithium-ion batteries, which industry experts said will knock out a batch of low-end battery cells and accelerate the structural adjustment of the country's booming lithium-ion battery sector.

The China Automotive Power Battery Industry Innovation Alliance predicted that by 2025, the country's lithium-ion battery production capacity will likely exceed 3,000GWh. However, the capacity utilization rate of the country's lithium-ion battery industry dropped to about 40 percent last year and is likely to reach 35 percent by 2025.

The Ministry of Industry and Information Technology unveiled a draft guideline on Wednesday that will guide lithium-ion battery companies to reduce projects that aim solely to expand production capacity. Instead, lithium-ion battery companies will be encouraged to strengthen technological innovation, improve quality and reduce production costs.

This Measures replaced the Measures for the Administration of Industry Standards for Lithium Ion Batteries (2021 Edition) (Announcement No. 37 [2021] by the Ministry of ...

China's Ministry of Industry and Information Technology on Wednesday issued new guidelines for its lithium-ion battery industry, aiming to transform, upgrade and promote ...

China's Ministry of Industry and Information Technology (MIIT) on Wednesday unveiled revised guidelines for the lithium-ion battery industry to further strengthen ...

BEIJING -- China's lithium-ion batteries reported solid growth last year amid nationwide endeavors to peak carbon dioxide emissions and achieve carbon neutrality, official ...

China's Ministry of Industry and Information Technology (MIIT) on Wednesday unveiled revised guidelines for the lithium-ion battery ...

On May 8th, according to a message on the website of the Ministry of Industry and Information Technology (MIIT), in order to further strengthen the management of the lithium ...

China is keen to optimize the management policies of the power battery industry, strengthening the overall planning of the industry's development while guiding rational ...

The China Automotive Power Battery Industry Innovation Alliance predicted that by 2025, the country's lithium-ion battery ...

The Ministry of Industry and Information Technology unveiled a draft guideline on Wednesday that will guide lithium-ion battery companies to reduce projects that aim solely to ...

The Ministry of Industry and Information Technology (MIIT) of China has opened a public consultation on , on four mandatory national standards. Safety of Lithium ...

China's Ministry of Industry and Information Technology (MIIT) has outlined its standard conditions of the lithium-ion battery ...

China's Ministry of Industry and Information Technology on Wednesday unveiled revised guidelines for the lithium-ion battery industry to further strengthen standardized ...

BEIJING, March 2 -- China's lithium-ion battery sector sustained its growth momentum in 2023, with the total output rising 25 percent year on year, official data showed. The sector saw its ...

Two drafts released by China's Ministry of Industry and Information Technology seek to enhance regulation and quality of lithium ...

China wants e-bike manufacturers to play a greater role in lithium-ion battery recycling, as concerns mount over the industry's safety ...

China's Ministry of Industry and Information Technology (MIIT) has outlined its standard conditions of the lithium-ion battery industry. This comes as an update to previous ...

On August 16, China's Ministry of Industry and Information Technology (MIIT) released the first half of 2024 the operation of the national lithium-ion battery industry.

On the afternoon of May 8, the Ministry of Industry and Information Technology issued the "Public Solicitation of Opinions on the Standard Conditions and Announcement Management ...

At the national level, the mandatory national standard "Safety Technical Specification of Lithium-ion Battery for Electric Bicycle," which ...

Two drafts released by China's Ministry of Industry and Information Technology seek to enhance regulation and quality of lithium-ion battery industry, promoting its high-quality ...

The Ministry of Industry and Information Technology issued the "Lithium-ion Battery Industry Standard Conditions" In order to strengthen the management of the lithium-ion battery ...
