**Mongolian home solar lights are
suitable for high**

Overview

When were solar home systems available in Mongolia?

Solar home systems were for sale in Mongolia by 1992, and perhaps earlier. Many of these systems were donated to Mongolia. For example in one early donation, between 1992 and 1996 Japan provided 200 solar power generators to herding families.

Can solar panels be used in Mongolia?

Mongolia's unique environment is perfectly situated for the use of solar panels. Mongolia has a dry climate, with long, cold but sunny winters, dry hot summers, low precipitation, and large temperature fluctuations. It is estimated that the country has 260 sunny days (Fassnacht et al., 2011) or 2791.5 hours of sunshine per year.

Can solar power be used for nomadic herders in Mongolia?

Capturing the Sun in the Land of the Blue Sky: Providing Portable Solar Power to Nomadic Herders in Mongolia. No. 72683. The World Bank, 2012. Kapadia, K. The Not-So-Sunny Side of Solar Energy Markets: A Case Study of Sri Lanka. 2003. University of California, Berkeley Masters Project.

Is Mongolia a good country for mobile solar power?

Mongolia is uniquely suited for mobile solar power systems. The country, landlocked between Russia and China, has long depended on vast coal deposits to provide electricity for some city centers. All grid-based electricity is generated and transmitted from one, government-owned system of coal power plants.
