## Overview

---

How many medium voltage substations are there in Morocco?

7 Medium voltage substations. The port of Laâyoune is the main and most versatile port of the Great South Region bringing an annual traffic of approximately 5 million tonnes of hydrocarbon imports, phosphate, and sand exports. It is also the largest fishing port in Morocco with approximately 43% from coastal fishing.

When will Morocco's solar project be completed?

The first plant, under the Moroccan Solar Plan, will be commissioned in 2014, and the entire project is expected to be complete in 2019. Once completed, the solar project is expected to provide almost one-fifth of Morocco's annual electricity generation.

How much solar power will Morocco have by 2027?

The report's most likely 'medium' scenario forecasts that Morocco will reach 2.27 GW of total installed solar capacity by 2027, and 2.97 GW by 2028.

What is Moroccan solar plan?

Moroccan Solar Plan Morocco has launched one of the world's largest and most ambitious solar energy plan with investment of USD 9billion. The Moroccan Solar Plan is regarded as a milestone on the country's path towards a secure and sustainable energy supply.
