

Morocco three-phase off-grid explosion-proof inverter

Overview

● 3kW off grid inverter with high conversion efficiency, up to 93% efficiency or more ● Dual mode start: reduced voltage start, inverter start ● Settable output frequency, LCD liquid crystal display ● With explosion-proof function, suitable for hazardous and easy-to-explode places, such as flour mills, coal mines underground. What is an off grid 3 phase inverter?

The off grid 3 phase inverter means that the voltage that converts DC to AC is three phase power supply, that is, AC 380V. It consists of three AC potentials with the same frequency, equal amplitude, and 120° phase difference, can carry industrial 3 phase electrical appliances.

What is xindun power 3 phase hybrid solar inverter off grid?

Off grid means that the inverter can be used when the power grid is not available, and it can be combined with battery pack to form a UPS backup power supply. Xindun Power 3 phase hybrid solar inverter off grid 3kva-200kva, can carry 1-phase and 3-phase loads at the same time, support 100% unbalanced loading.

What is the production capacity of high-power 3 phase solar inverter?

The inverter production plant is 10,000 square meters, 8 production lines and about 200 employees. The monthly production capacity of high-power 3 phase hybrid solar inverter (10Kw~150Kw) is 8,000 units. It is worth mentioning that there are very few manufacturers producing high-power 3 phase solar inverters off grid in the market.

Who is the largest off grid inverter manufacturer & exporter in China?
