Mozambique Communication Green Base Station Equipment Processing Factory

Overview

What will ABB do for Mozambique LNG project?

ABB will deliver an end-to-end electrification package for landmark natural gas project off the coast of Africa CCS JV, comprising Saipem, McDermott and Chiyoda, has signed a deal with ABB to provide comprehensive integrated and intelligent electrical systems for the east-African Mozambique LNG field which is expected to start production by 2024.

How many E-houses will be built at Mozambique LNG project?

Fourteen large onshore electrical houses (e-houses) or prefabricated electrical substation buildings (PESB) – specifically designed for oil and gas applications, will be built by ABB team in Singapore and transported to the Mozambique LNG Project site.

Why should Mozambique invest in LNG?

With LNG capacity of approximately 13 million tonnes per annum, the current development will spearhead crucial economic and social investment for Mozambique.
