# **Multifunctional energy storage power supply production in East Timor**

## Overview

---

What is the Timor-Leste solar power project?

The Project involves the construction and 25-year operation of a new power plant in Manatuto, Timor-Leste, comprising a 72 MW solar power plant co-located with a 36 MW/36 MWh battery energy storage system. This will be the country's first full-scale renewable energy IPP project.

How much electricity does East Timorese use?

In 2022, its electricity consumption was 414.76 million kilowatt-hours. Imported fossil fuels are the primary source of energy for the country, but access to this energy is highly uneven. A majority of East Timorese live in rugged mountainous areas, and only 5 percent of these households are connected to the electricity grid.

Why did DLA Piper advise Eletricidade de Timor-Leste?

DLA Piper advised Eletricidade de Timor-Leste on its first utility-scale solar PV and battery storage project with a 100MW capacity, marking a major milestone in the country's renewable energy transition.

What is the official name of East Timor-Leste?

Official Name: Democratic Republic of Timor-Leste. Summary: East Timor has not yet developed rich oil and natural gas deposits, given some disputes over its sovereignty, and remains dependent on imported fossil fuels while investigating sources for small-scale renewable energy.
