# **Muscat Communications deploys 5g base stations**

## Overview

---

Will China build a 5G base station next year?

Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

How many 5G stations are there in China?

As of January 2025, China had 4.25 million 5G base stations, a figure expected to reach 4.5 million by the end of the year. More than 1 billion 5G connections are live, accounting for over 50% of all mobile connections in the country, the GSMA executive added. "We see the impact everywhere," he said.

Where can mobile users enjoy ultra-fast 5g-a speeds?

Mobile users can now enjoy ultra-fast 5G-A speeds in landmark locations such as the West Lake scenic area, the Hubin business district and metro stations, according to China Media Group (CMG).

Is 5g-a the world's leading Metro deployment?

Recently, residents in Beijing's urban districts, as well as passengers on the Beijing Metro Line 3, have been able to access faster 5G-A networks, a rollout described by the China Unicom Beijing branch as the world's leading metro deployment, the Global Times observed.
