Muscat solar rooftop power generation system

Overview

Is a rooftop PV-Grid independent system feasible in Oman?

A rooftop PV-grid independent system is feasible in Oman by considering reduction of energy demand per household, the introduction of support policies and a reduction in battery costs [29, 30]. A 1 MW grid connected solar PV in Adam city, Oman was assessed.

Which areas in Oman are suitable for solar PV projects?

The Northern part of Oman, coastal areas and Salalah are the most populated areas in Oman , which are suitable for solar PV projects. Off-grid solar PV projects are suitable for the central areas of Oman. Fig. 3. Population density of Oman . Source: NCSI, Oman. 2.5. Discussion on solar PV project suitability in various regions across Oman.

Does Oman have a solar system?

Also, Oman has implemented policies for rooftop PV systems such as Sahim rooftop solar PV initiative and several solar projects have been initiated since 2020 that are expected to be operational, before 2030 .

How much does solar PV cost in Oman?

Fig. 18. LCOE of solar PV for various UTAS branches. Electricity generation in Oman mostly depends on natural gas, with the estimated Levelized Cost of Electricity (LCOE) ranging from \$30 to \$40 per megawatt hour, as stated in a report by the International Energy Agency .
