## Overview

---

What is the largest battery storage facility in the Netherlands?

(PRESS RELEASE) ROTTERDAM, 6-Jan-2025 — / EuropaWire / — FlevoBESS is set to launch the largest battery storage facility in the Netherlands by the end of 2025, with a remarkable capacity of 31.6MW/126.4MWh. Construction preparations for the facility are already underway.

What's happening at RWE's Moerdijk power station?

At RWE's Moerdijk power station, commissioning of its ultra-fast synthetic inertia battery energy storage system is progressing well. With an installed capacity of 7.5 MW and a storage capacity of 11 MWh, this battery is one of the first of its kind on mainland Europe to maintain grid stability, using highly innovative technology.

What is EP NL & Eneco doing at Europoort?

15.7.2025 EP NL and Eneco are realising a large-scale battery project at Enecogen's Europoort power plant, in which both parties hold a 50% stake. The battery will have a connection capacity of 50 MW and an energy storage capacity of 200 MWh, enabling it to supply electricity for four hours.

Who is responsible for battery development in the Netherlands?

Enecogen is responsible for maintenance and operations. The EP NL and Eneco trading departments control the battery. Batteries are indispensable and acceleration is necessary. Batteries are indispensable for the energy transition. Yet the development of battery projects in the Netherlands lags behind that in other countries.
