New Delhi s first shared power base station

Overview

Why is India launching a battery energy storage system?

In Detail : India has approved its first commercial standalone Battery Energy Storage System (BESS) project, marking a milestone in the country's progress towards clean and renewable energy.

What is India's 'first commercially approved' energy storage system?

The system is also India's "first commercially approved" utility-scale energy storage system that will ensure improved power supply in different South Delhi areas, covering a population of over one lakh people, said a statement of power discom BRPL (BSES Rajdhani Power Limited).

What is BSES Rajdhani power project?

The Delhi Electricity Regulatory Commission (DERC) issued regulatory approval to a 20 MW/ 40 MWh BESS at the 33/11 kV Kilokari sub-station belonging to BSES Rajdhani Power Ltd, the largest power distribution company in Delhi with close to 30 lakh consumers. The project will enable 24/7 power for over 12,000 low-income consumers.

Which is South Asia's largest battery energy storage system?

Delhi's Power Minister Ashish Sood inaugurated a 20-MW battery energy storage system (BESS) at Kilokari, hailed as South Asia's largest. This commercially approved system will enhance power supply for over one lakh South Delhi residents.
