Overview

Will New Zealand invest in battery energy storage systems?

The Electricity Authority Te Mana Hiko has published a draft two-year roadmap that sets out our work to support investment in battery energy storage systems (BESS). BESS will become increasingly important in the future as New Zealand's power system relies on more intermittent and variable generation. Work set out in the roadmap includes:

Is New Zealand's first large-scale grid battery storage system complete?

Construction of New Zealand's first large-scale grid battery storage system is now complete, with Meridian Energy's Ruakākā Battery Energy Storage System (BESS) being officially opened in a ceremony later today.

Which energy company is building New Zealand's first grid-connected battery energy storage system?

Meridian Energy is building New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakākā on North Island. Paris, Janu-Saft, a subsidiary of TotalEnergies, has been awarded a major contract by Meridian Energy to construct New Zealand's first large-scale grid-connected BESS.

When will New Zealand's energy storage project come online?

The energy storage project is expected to come online during the July-to-September period of 2026. Saft described the Huntly Power Station as "the single largest electricity generation site in New Zealand." New Zealand welcomed its first utility-scale battery energy storage system earlier this year.

Store renewable energy safely in TITAN's high-tech battery ...

The energy storage project is expected to come online during the July-to-September period of 2026. Saft described the Huntly Power ...

CentrePort is taking another step on its energy journey with an onsite battery energy storage system (BESS) which will improve resilience and enhance the potential for ...

Construction of the 100 MW / 200 MWh Meridian Energy Ruakaka battery energy storage system on New Zealand's North Island is ...

This major contract for Genesis will be Saft's third utility-scale BESS to support the New Zealand grid. This success is based on the growing reputation of our Intensium lithium ...

New Zealand aims to transition to renewable energy, and battery storage plays a vital role in this effort by enhancing grid stability and integrating intermittent renewable sources like wind and ...

Construction of New Zealand's first large-scale grid battery storage system is now complete, with Meridian Energy's Ruakaka Battery Energy Storage System being officially ...

CentrePort is taking another step on its energy journey with an onsite battery energy storage system (BESS) which will improve ...

Construction of New Zealand's first large-scale grid battery storage system is now complete, with Meridian Energy's Ruakaka Battery ...

Store renewable energy safely in TITAN's high-tech battery containers. Rent 10ft and 20ft high cubes fully loaded with Li-ion batteries today.

The energy storage project is expected to come online during the July-to-September period of 2026. Saft described the Huntly Power Station as "the single largest ...

Construction of the 100 MW / 200 MWh Meridian Energy Ruakaka battery energy storage system on New Zealand's North Island is now complete.

This major contract for Genesis will be Saft's third utility-scale BESS to support the New Zealand grid. This success is based on the ...

Meridian Energy is building New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakaka on North Island Saft lithium-ion technology will ...

The Electricity Authority Te Mana Hiko has published a draft two-year roadmap that sets out our work to support investment in battery energy storage systems (BESS). BESS ...

Why Energy Storage Matters in New Zealand New Zealand has committed to generating 100% renewable electricity by 2030, making energy storage systems essential for managing solar ...
