

New energy storage projects in Europe

Overview

How many energy storage projects are there in Europe?

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the European Commission. The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe.

What is the European energy storage inventory?

The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe. A real-time dashboard for energy storage also includes their locations and technologies – chemical storage, electrochemical storage, mechanical storage, and thermal storage.

How many battery energy storage systems were installed in Europe in 2024?

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe's total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.

What is the largest energy storage project in Europe?

Particularly noteworthy is the ambitious project in Alfeld (Lower Saxony), which is considered the largest approved storage project in Europe with a performance of 137.5 megawatts and a storage capacity of 275 megawatt hours.

New energy storage projects in Europe

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the European Commission. The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe.

The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe. A real-time dashboard for energy storage also includes their locations and technologies - chemical storage, electrochemical storage, mechanical storage, and thermal storage.

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe's total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.

Particularly noteworthy is the ambitious project in Alfeld (Lower Saxony), which is considered the largest approved storage project in Europe with a performance of 137.5 megawatts and a storage capacity of 275 megawatt hours.

Italy, Germany, Spain, France and Ireland expected to be the leading EU countries for storage deployment between now and 2031 ...

The latest edition of the European Market Monitor on Energy Storage by the European Association for Storage of Energy and LCP ...

The aim of the European Energy Storage Inventory is to record all European energy

storage projects by status - in operation, planned ...

Several ambitious energy storage projects are underway across Europe: Earba Storage Project, Scotland: A proposed pumped-storage hydroelectricity scheme with a ...

The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe. A real-time ...

Following similar pieces in 2022/23, we look at the biggest energy storage projects, lithium and non-lithium, that we've reported on in ...

Depending on how energy is stored, storage technologies can be broadly divided into the following three categories: thermal, electrical and hydrogen (ammonia). The electrical ...

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing ...

Revenue stacking models - where batteries participate in energy arbitrage, grid balancing, and capacity mechanisms - are already ...

The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy ...

A total of 11.9GW of energy storage across all scales and technologies was installed in Europe in 2024, bringing cumulative ...

The fleet of energy storage projects in Europe, including both pumped hydro and battery energy storage systems of all sizes, is expanding rapidly. This growth is set to continue ...

The aim of the European Energy Storage Inventory is to record all European energy storage projects by status - in operation, planned ...

Explore the European Energy Storage Projects Dive into the map of Energy Storage Projects using interactive tools and filter options by status, technology, subtechnology, and more.

A total of 11.9GW of energy storage across all scales and technologies was installed in Europe in 2024, bringing cumulative installations to 89GW. According to the ninth annual

...

In Europe, the capacity of renewable energy sources is growing very rapidly, while traditional power plants are slowly being ...

The race to revolutionize energy storage stands at a critical turning point in 2024. As renewable energy adoption accelerates across ...

The EU is transforming the RE sector, improving grid efficiency with Battery Energy Storage projects. Watch out for these BES projects in 2023.

A new interactive platform--the European Energy Storage Inventory --has been launched to provide near real-time insights into energy storage deployment across the EU, ...

The European Energy Storage Inventory presents itself as an interactive and user-friendly dashboard, which enables a detailed recording and presentation of energy storage ...

The aim of the European Energy Storage Inventory is to record all European energy storage projects by status - in operation, planned and under construction -, by location and by ...

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources.

In terms of other energy storage solutions, battery storage projects are rising and a variety of new technologies to store energy are also rapidly developing and becoming ...

The latest edition of the European Market Monitor on Energy Storage by the European Association for Storage of Energy and LCP Delta, released on 31 March, highlights ...
