New mobile generator power station

Overview

What is a portable power station?

A solar generator is a portable power station that supports solar panel input. They are often used interchangeably, but not all power stations come with solar panels. How long does a portable power station last during an outage?

Run time depends on capacity and load.

Can a portable power station be turned into a solar generator?

Using DJI's solar panels, you can turn your portable power station into a solar generator. This setup provides all the unlimited energy the sun has to offer, without the noise, pollution or recurring fuel payments associated with a traditional generator.

What is a mobile power station?

Enjoy clean, eco-friendly energy with zero fumes. Our Mobile Power Station reduces your carbon footprint and is especially effective at cutting down on Net-CO2 when charged with solar. Mobile Power Station. A direct alternative to a gas/diesel generator of the same size.

What is the difference between a generator and a portable power station?

A portable power station is essentially a big rechargeable battery that you carry around. Deplete it, and it's useless until you can recharge. A generator, by definition, is a device that actually converts some type of energy to usable electricity in whatever circuitry you have it connected to.
