# Niue power UPS uninterruptible power supply device

## Overview

---

What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS) | Schneider Electric Hong Kong, China. An Uninterruptible Power Supply system provides emergency power when the main source fails, using batteries to ensure a continuous supply. It conditions incoming power, protecting equipment from fluctuations. We offer various UPS power supply types for different needs.

How does a ups protect a device from sudden power failure?

An uninterruptible power supply (UPS) protects valuable devices from sudden power failures by providing backup power during power outages. This ensures a steady power supply to connected devices.

What is an uninterrupted power supply (UPS) battery backup?

An uninterrupted, or uninterruptible power supply (UPS) works as a battery, surge protector and power inverter for household and office electronics.

How does a UPS work?

A UPS works by detecting power failures or fluctuations and instantly switching to battery power. It converts AC power into DC power to charge its batteries and then back into AC for connected devices. When electricity is restored, it recharges the batteries.
